

4.5L NEIPA

4.5L New England IPA all grain beer kit makes 8 pints of fruity, hoppy and juicy NEIPA. Choose your New England IPA hops! A base of pale malts and crystal oats with a New England IPA dried Hophead yeast to give the signature refreshing, cloudy NEIPA beer style and you can choose what hops to add to this beer kit - they will all deliver a massively juicy heavily hopped New England IPA. Approx; 6.2-6.8% ABV.

- Mosaic - Citrus, tropical fruit and blueberry
- Azacca - Mango, pine, citrus
- Simcoe - Pine, grapefruit, passionfruit
- Motueka - lemon, lime, floral
- Amarillo - Floral, citrus, orange
- Idaho - Tropical fruit, citrus, pine
- El Dorado - Stone fruits, pear, watermelon, tropical - SOLD OUT

This is an all grain beer brew kit where the grains need to be mashed in a pot to extract the malt extract and then boiled with hops and cooled prior to fermenting - the same process as used in breweries so you are brewing a Craft beer on a small batch scale.

Includes the freshly milled malts, hops and yeast in the exact quantities you need to brew 8 pints of craft NEIPA.

The full instructions for brewing this kit are available on this page in the Additional Information/FAQ section to download and print.

To brew and serve this beer kit you will need this equipment;

- Mashing - 10 litre capacity pot and mash or muslin bag to mash the grains and boil with your hop additions
- Fermenting equipment - such as 5L demijohn or fermenting bin fitted with airlock and bung, a siphon, hydrometer, thermometer, equipment steriliser,
- Bottling- 8 x 500ml bottles or equivalent bottles to 4.5L capacity (PET screw topped bottles or glass bottles with crown caps and capper). You can reuse your own glass bottles but you will need a capper and caps.

If you have a Brooklyn brew starter kit or similar your demijohn will be fine but we recommend you also get a muslin or fine straining bag for the mash (which contains the grain and makes a clearer beer) and a thermometer and hydrometer (which helps you determine when the brew is ready to bottle and get your fermenting temp right).

New England IPA Small Batch Brewery recipe kit is also available in a 9L and 19L all grain version.

9L NEIPA

9L New England IPA all grain beer kit makes 16 pints of fruity, hoppy and juicy NEIPA. Choose your New England IPA hops! A base of pale malts and crystal oats with a New England IPA dried Hophead yeast to give the signature refreshing, cloudy NEIPA beer style and you can choose what hops to add to this beer kit - they will all deliver a massively juicy heavily hopped New England IPA. Approx; 6.2-6.8% ABV.

- Mosaic - Citrus, tropical fruit and blueberry
- Azacca - Mango, pine, citrus
- Simcoe - Pine, grapefruit, passionfruit
- Motueka - lemon, lime, floral
- Amarillo - Floral, citrus, orange
- Idaho - Tropical fruit, citrus, pine
- El Dorado - Stone fruits, pear, watermelon, tropical

This is an all grain beer brew kit where the grains need to be mashed in a pot to extract the malt extract and then boiled with hops and cooled prior to fermenting - the same process as used in breweries so you are brewing a Craft beer on a small batch scale.

Includes the freshly milled malts, hops and yeast in the exact quantities you need to brew 16 pints of craft NEIPA.

The full instructions for brewing this kit are available on this page in the Additional Information/FAQ section to download and print.

To brew and serve this beer kit you will need this equipment;

- Mashing - 20 litre capacity pot and mash/ muslin/ straining bag to mash the grains and boil with your hop additions, or Grainfather fitted with the MicroPipework to accommodate the smaller batch size, or 20L Braumeister etc.
- Fermenting equipment - such as 11L carboy or 10L fermenting bin fitted with airlock and bung, a siphon, hydrometer, thermometer, equipment steriliser,
- Bottling- 16 x 500ml bottles or equivalent bottles to 9L capacity (PET screw topped bottles or glass bottles with crown caps and capper). You can reuse your own glass bottles but you will need a capper and caps.

New England IPA Small Batch Brewery recipe kit is also available in a 4.5L and 19L all grain version.

19L NEIPA

19L New England IPA all grain beer kit makes 34 pints of fruity, hoppy and juicy NEIPA. Choose your New England IPA hops! A base of pale malts and crystal oats with a New England IPA dried Hophead yeast to give the signature refreshing, cloudy NEIPA beer style and you can choose what hops to add to this beer kit - they will all deliver a massively juicy heavily hopped New England IPA. Approx; 6.2-6.8% ABV.

- Mosaic - Citrus, tropical fruit and blueberry
- Azacca - Mango, pine, citrus
- Simcoe - Pine, grapefruit, passionfruit
- Motueka - lemon, lime, floral
- Amarillo - Floral, citrus, orange
- Idaho - Tropical fruit, citrus, pine
- El Dorado - Stone fruits, pear, watermelon, tropical

This is an all grain beer brew kit where the grains need to be mashed in a pot / mash tun/ Grainfather or similar system to extract the malt extract and then boiled with hops and cooled prior to fermenting - the same process as used in breweries so you are brewing a Craft beer on a small batch scale.

Includes the freshly milled malts, hops and yeast in the exact quantities you need to brew 34 pints of craft NEIPA.

The full instructions for brewing this kit are available on this page in the Additional Information/FAQ section to download and print.

To brew and serve this beer kit you will need this equipment;

- Mashing - 35 litre capacity pot and straining/mash/ muslin bag for stove top or all grain mash equipment to mash the grains and boil with your hop additions
- Fermenting equipment - such as 23L min capacity carboy or fermenting bin fitted with airlock and bung, a siphon, hydrometer, thermometer, equipment steriliser,
- Bottling- 34 x 500ml bottles or equivalent bottles to 19L capacity (PET screw topped bottles or glass bottles with crown caps and capper). You can reuse your own glass bottles but you will need a capper and caps.

This New England IPA Small Batch Brewery recipe kit is also available in a 4.5L all grain version.

4.5L Classic Bitter

Small Batch Brewery UK Classic Bitter all grain ingredients kit makes a well rounded, easy drinking and moreish amber UK Bitter. Rich and sweet crystal malts provide a sweet malt base for balance alongside tangy, bitter, and fruity hops. This is an all grain beer brew kit where the grains need to be mashed in a pot to extract the malt extract and then boiled with hops and cooled prior to fermenting - the same process as used in breweries so you are brewing a Craft beer on a small batch scale. You can upgrade the dried yeast which is included with this beer kit to use a live liquid yeast instead. Live yeast should be stored in the fridge until the night before or 4/5 hours before you plan to ferment your brew.

- Hoppiness rating 3/5
- Colour 1/5 (pale)
- Taste: Refreshing and well balanced moderately hopped pale ale.
- Aroma: Grassy and earthy with light floral aromas.
- Approx 5.4% ABV.

Includes the freshly milled malts, hops and yeast in the exact quantities you need to brew 8 pints of craft Bitter. The full instructions for brewing this kit are available on this page in the Additional Information/FAQ section to download and print.

To brew and serve this beer kit you will need this equipment;

- Mashing - 10 litre capacity pot and mash or muslin bag to mash the grains and boil with your hop additions
- Fermenting equipment - such as 5L demijohn or fermenting bin fitted with airlock and bung, a siphon, hydrometer, thermometer, equipment steriliser,
- Bottling- 8 x 500ml bottles or equivalent bottles to 4.5L capacity (PET screw topped bottles or glass bottles with crown caps and capper). You can reuse your own glass bottles but you will need a capper and caps.

If you have a Brooklyn brew starter kit or similar your demijohn will be fine but we recommend you also get a muslin or fine straining bag for the mash (which contains the grain and makes a clearer beer) and a thermometer and hydrometer (which helps you determine when the brew is ready to bottle and get your fermenting temp right).

UK Classic Bitter Small Batch Brewery recipe kit is also available in 11L and 23L all grain versions and 4.5L, 11L and 23L Extract version kit. If you want to try a larger batch you will need a larger fermenter and a bigger mashing pot, and more bottles but the rest of the equipment is the same. We also do these brew kits in Extract versions where the majority of the grain is pre mashed, the Extract kits have steeping grains and hops to boil prior to fermentation which cuts down the time taken to ready your brew for fermentation and allows you to use a smaller pot if necessary.

4.5L WHEAT BEER

Small Batch Brewery 4.5L Wheat Beer all grain ingredients beer brew kit makes 8 pints of a refreshing Bavarian style wheat beer with a silky smooth malt base and rich fruity and spicy flavours.

- Hoppiness rating 2/5
- Colour 1/5
- Taste: Silky smooth, banana, clove and wheat.
- Aroma: Banana and clove
- Approx. 5.6% ABV

This is an all grain beer brew kit where the grains need to be mashed in a pot to extract the malt extract and then boiled with hops and cooled prior to fermenting - the same process as used in breweries so you are brewing a Craft beer on a small batch scale. You can upgrade the dried yeast which is included with this beer kit to use a live liquid yeast instead. Live yeast should be stored in the fridge until the night before or 4/5 hours before you plan to ferment your brew.

Includes the freshly milled malts, hops and yeast in the exact quantities you need to brew 8 pints of craft wheat beer. The full instructions for brewing this kit are available on this page in the Additional Information/FAQ section to download and print.

To brew and serve this beer kit you will need this equipment;

- Mashing - 10 litre capacity pot and mash or muslin bag to mash the grains and boil with your hop additions
- Fermenting equipment - such as 5L demijohn or fermenting bin fitted with airlock and bung, a siphon, hydrometer, thermometer, equipment steriliser,
- Bottling- 8 x 500ml bottles or equivalent bottles to 4.5L capacity (PET screw topped bottles or glass bottles with crown caps and capper). You can reuse your own glass bottles but you will need a capper and caps.

To brew and serve this beer kit you will need this equipment;

- Mashing - 10 litre capacity pot and mash or muslin bag to mash the grains and boil with your hop additions
- Fermenting equipment - such as 5L demijohn or fermenting bin fitted with airlock and bung, a siphon, hydrometer, thermometer, equipment steriliser,
- Bottling- 8 x 500ml bottles or equivalent bottles to 4.5L capacity (PET screw topped bottles or glass bottles with crown caps and capper). You can reuse your own glass bottles but you will need a capper and caps.

If you have a Brooklyn brew starter kit or similar your demijohn will be fine but we recommend you also get a muslin or fine straining bag for the mash (which contains the grain and makes a clearer beer) and a thermometer and hydrometer (which helps you determine when the brew is ready to bottle and get your fermenting temp right).

Continental Saison Small Batch Brewery recipe kit is also available in 11L and 23L all grain versions and 4.5L, 11L and 23L Extract version kit. If you want to try a larger batch you will need a larger fermenter and a bigger mashing pot, and more bottles but the rest of the equipment is the same. We also do these brew kits in Extract versions where the majority of the grain is pre mashed, the Extract kits have steeping grains and hops to boil prior to fermentation which cuts down the time taken to ready your brew for fermentation and allows you to use a smaller pot if necessary.

4.5L US IPA

Small batch Brewery 4.5L US IPA all grain ingredients kit makes 8 pints a big and hoppy American style IPA . A strong and well rounded malt base carries big zesty, grapefruit, resinous, hop flavours and aroma.

- Hoppiness rating 4/5
- Colour 2/5
- Taste: Big hit of grapefruit and citrus US hops and a bitter finish.
- Aroma: Citrus, zesty, resinous, floral.
- Approx 6.4% ABV

This is an all grain beer brew kit where the grains need to be mashed in a pot to extract the malt extract and then boiled with hops and cooled prior to fermenting - the same process as used in breweries so you are brewing a Craft beer on a small batch scale. You can upgrade the dried yeast which is included with this beer kit to use a live liquid yeast instead. Live yeast should be stored in the fridge until the night before or 4/5 hours before you plan to ferment your brew.

Includes the freshly milled malts, hops and yeast in the exact quantities you need to brew 8 pints of craft IPA. The full instructions for brewing this kit are available on this page in the Additional Information/FAQ section to download and print.

To brew and serve this beer kit you will need this equipment;

- Mashing - 10 litre capacity pot and mash or muslin bag to mash the grains and boil with your hop additions
